**A Report on Ecowave Unveil: A Visual Journey of Green Initiative-The Student Council
(2023-24)**

“One step towards nature will enhance our Mother Earth” this is exactly where we the council members initiated to organize a competition which aims at improving our planet through various creative activities. The student council organised a Green Idea Competition called as “Eco-Unveil” which was a short film, documentary or animation making competition held in the month of March. The result was declared on 23rd March 2024.

The council members promoted the event and spread awareness for active participation. A drive link was forwarded to upload the videos. The students got a chance to learn, share their knowledge and express their creativity through attractive videos. The students also helped us learn what steps we can take at the grass root level to make the world a better place to live. Our students participated in the event and created excellent videos in promoting green ideas.

The innovative ideas we can implement which initially unheard of and were eye opening. We also acquired knowledge about how our world leaders and companies are putting in their two cents for betterment of the planet. Overall, the event was an educative and ignited a passion for the environmental causes.

There were two participants taking part in the competition. It was a successful event organized by the Student Council.
